[Respiratory and deglutition pathology in malocclusion]

[Article in Italian]

[Minervini G](#), [Scioli F](#), [Torino M](#).

Università degli Studi di Napoli.

The Authors, in this work, describe the repercussions fixed by the pathology of the first respiratory organs and of the deglutition both at expense of maxillo-facial development and at systematic-level; by beginning from physiologic mechanisms, the most frequent causes of the oral respiration and the atypic deglutition are analysed.
